

What is a rebuildable vehicle?

A rebuildable vehicle is one that has been wrecked, stolen, or any vehicle the insurance company has paid out to their customer for damages. We purchase these vehicles and repair them back to a road-worthy condition. All of our vehicles are inspected by Kansas Highway Patrol, as required by the state, once repairs are complete.

Why Buy a Rebuildable Vehicle:

- It's green! We are essentially recycling a previously damaged vehicle that is able to be repaired and be put back on the road.
- Price. Our vehicles, on average, sale around Trade-In Value. This puts more money back in your pocket.
- Options. We strive to purchase lower mileage and lower wear vehicles.

What we Offer:

We aim to help you find a vehicle that meets your specifications for a reasonable price. We do have inventory available, but we also offer our services to buy in a vehicle of your choice & budget.

How the Process Works:

- You provide your criteria by stopping by in person, or completing the form on our site along with your budget.
- We locate possible vehicles that fit your criteria and get your approval.
- Once we have found a vehicle, we provide an estimate of repairs which includes the purchase price of the vehicle. This estimate will be the amount of your budget.
- We bid live in auction on the vehicle. If we win it, an invoice will be billed with the purchase price + auction fees & hauling.
- Once we get the vehicle in, we have you come in to view it & do a full walk through & actual damage estimate.
- We complete repairs & get the vehicle inspected.
- The vehicle is now ready for pickup. You come to do the final walk through & complete all titlework.
- Final payment is due for all repairs & sales tax.

See our Terms & Conditions for more details, or call us today!
